

Meade County

Estimated Economic Impact of Agriculture, Food, and Food Processing Sectors 10/8/14

10 agriculture, food, and food processing sectors were analyzed to determine their overall contribution to the Meade County economy.

These 10 sectors have a total direct output of approximately \$243 million and support 721.2 jobs in Meade County. Running the model for all 10 sectors simultaneously produces the following results:

Agriculture Contribution in Meade Co									
Impact Type ²	Employment	%	Total Value	% of Gross	Output ⁵	% of Gross			
		Employment	Added ³	Regional	_	Regional			
				Product ⁴		Product			
Direct Effect	721.2	24%	55,554,449.3	29%	242,909,779.1	129%			
Indirect									
Effect	193.1	6%	20,902,069.2	11%	33,527,387.2	18%			
Induced									
Effect	146.6	5%	10,397,834.0	6%	16,524,625.4	9%			
Total Effect	1,060.9	35%	86,854,352.5	46%	292,961,791.6	155%			

As shown in the above table, agriculture, food, and food processing supports 1,060.9 jobs, or 35% of the entire workforce in the county. These industries provide a total economic contribution of approximately \$293 million, roughly 155% of Gross Region Product (GRP). As noted below in the calculation of Gross Regional Product, imports and institutional sales are subtracted. Therefore, counties that import a relatively large amount of goods and services will have a reduced GRP which may lead to agricultural output being greater than GRP.

Another metric used to calculate the importance of sectors in an economy is their value added as a percentage of GRP. Total value added by the 10 agriculture, food, and food processing sectors is approximately \$87 million, or 46% of the GRP. This indicates that personal income, business income, and taxes generated by these sectors account for 46% of the total economy.

¹ Article on building a contribution analysis in IMPLAN that avoids double counting: http://www.implan.com/index.php?option=com_content&view=article&id=660%3A660&catid=253%3AKB33&Itemid=70

² Direct, indirect, and induced effects sum together to estimate the total economic contribution in the state. **Direct effects** capture the contribution from agricultural and food products. **Indirect effects** capture the economic benefit from farms and agricultural businesses purchasing inputs from supporting industries within the state. **Induced effects** capture the benefits created when employees of farms, agricultural businesses, and the supporting industries spend their wages on goods and services within the state.

³ Value added = labor income + indirect business taxes + other property type income.

⁴ GRP = final demand of households + governments expenditures + capital + exports - imports - institutional sales.

 $^{5 \}text{ Output} = \text{intermediate inputs} + \text{value added}.$

The following tables document the overall summary numbers of the model, top industries affected by employment and output, and a listing of all industries that were analyzed.

In the top ten by employment, Grain farming is the top employer in the agriculture industry with 515.0 employees. This table also shows the amount of jobs that are created by the agriculture industry in Meade County.

Description	Total Employment	Total Output
Grain farming	515.0	118,074,059.8
Cattle ranching and farming	136.4	84,262,112.5
Real estate establishments	57.1	7,341,237.9
Monetary authorities and depository credit intermediation activities	36.9	12,428,718.4
Wholesale trade businesses	26.8	5,137,341.0
Support activities for agriculture and forestry	23.7	533,063.5
Private household operations	18.1	62,271.8
Animal production, except cattle and poultry and eggs	15.9	3,168,053.7
Securities, commodity contracts, investments, and related activities	15.5	1,765,062.7
Food services and drinking places	14.3	715,262.7

The Grain farming industry directly contributes approximately \$118 million to Meade County's economy. This table also shows how much revenue is generated in other industries by having a strong agriculture industry.

Description	Total Employment	Total Output
Grain farming	515.0	118,074,059.8
Cattle ranching and farming	136.4	84,262,112.5
All other crop farming	10.4	15,009,809.9
Other animal food manufacturing	9.7	14,373,562.1
Monetary authorities and depository credit intermediation activities	36.9	12,428,718.4
Real estate establishments	57.1	7,341,237.9
Wholesale trade businesses	26.8	5,137,341.0
Imputed rental activity for owner-occupied dwellings	0.0	5,099,565.2
Oilseed farming	7.0	4,425,813.9
Animal production, except cattle and poultry and eggs	15.9	3,168,053.7

Below is a summary of all agriculture data with employment levels and output level. These values can tell how many jobs are represented by each agriculture sector and the output they contributed to Meade County's economy.

All 105 counties in Kansas have Implan models and agriculture contribution summary. These values do not factor in the retail environment of food sales. Food retail is important, but in order to provide the most accurate picture of what production agricultural and processing contributes to Kansas, the retail sector was omitted.
